SUMMARY

B.Tech CSE student focused on Data Science, Machine Learning, Deep Learning, NLP, and Generative AI. Hands-on experience with Python, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, Flask, and FastAPI through practical projects. Strong foundation in data preprocessing, EDA, ML model development, and AI application development.

EDUCATION

MIMIT, Malout, Punjab	2023 – 2027
<i>B.Tech in Computer Science and Engineering</i>	
Senior Secondary (Class XII)	CGPA: 6.91/10 through 6th Semester 2022
<i>Higher Secondary Education</i>	73.4%
Secondary (Class X)	2020
<i>Secondary Education</i>	63.2%

TECHNICAL SKILLS

Languages: Python, Java, SQL
Data Science: NumPy, Pandas, Matplotlib, Seaborn, EDA, Data Preprocessing, Feature Engineering
Machine Learning: Scikit-learn, Regression, Classification, Clustering, Decision Trees, Random Forest, XGBoost, Model Evaluation, Hyperparameter Tuning
Deep Learning: TensorFlow, Keras, ANN, CNN, RNN, LSTM
NLP & GenAI: NLP, Transformers, LLM Concepts, Prompt Engineering, Generative AI
Development & Tools: Flask, FastAPI, Git, GitHub, VS Code, Jupyter Notebook, IntelliJ IDEA
Databases: MySQL, PostgreSQL

PROJECTS

Face Emotion Recognition | *Python, TensorFlow, Keras, OpenCV, Flask*
– Developed a CNN-based facial emotion recognition application for classifying human facial expressions.
– Integrated a trained Keras model with Flask for image-based emotion prediction and implemented OpenCV preprocessing.

English–Hindi Language Translator | *Python, NLP, Pandas, Deep Learning*
– Processed and analyzed a bilingual dataset containing 374K+ English–Hindi sentence pairs using Pandas.
– Implemented data cleaning and NLP preprocessing pipelines and explored sequence-to-sequence translation approaches.

House Price Prediction | *Python, Pandas, Scikit-learn, Flask*
– Built a regression-based house price prediction model with data preprocessing, model training, evaluation, and inference.
– Deployed the trained ML model through a Flask web application for real-time predictions.

FastAPI Bookstore REST API | *Python, FastAPI, Pydantic, REST API*
– Developed a modular REST API with FastAPI and Pydantic, implementing routes, data validation, and structured models.
– Applied modular architecture to improve maintainability and organization of the backend application.

Anku-AI Fashion Assistant | *Python, AI/ML, NLP, Generative AI* [\[GitHub\]](#)
– Developed an AI-powered fashion assistant for providing personalized fashion recommendations based on user requirements.
– Applied Python-based data processing and AI/ML techniques to analyze fashion-related information and generate recommendations.
– Explored NLP and Generative AI concepts to improve conversational interaction and recommendation capabilities.

RELEVANT COURSEWORK

Data Structures and Algorithms in Java, Data Science, Machine Learning, Artificial Intelligence, Deep Learning, NLP, Database Management Systems, Object-Oriented Programming

CERTIFICATIONS & LEARNING

- Python Programming and its Applications in Data Science – SWAYAM
- Hands-on learning in Machine Learning, Deep Learning, NLP, Transformers, and Generative AI.
